When you're running for local office for the first time, there are plenty of mistakes you can make. The good thing is that you're not the first person ever to face the challenges of running for office - even though sometimes it might seem like it. In this book, Craig W. Turner collects stories, advice, warnings and best practices from local candidates from around the country who have been there and done that. They've already seen what you're about to see, and they've generously shared their experiences for the benefit of you and other first-time candidates for local office. This is no poli-sci class. This is "in the trenches" life experience. Everyone interviewed for this book as part of The Campaign Coach Podcast, has run and won at least one election. Some are now retired, some have moved on to higher office, and some are still serving in the capacity we discussed in their interview. In these pages, you will find insights that no guidebook or online course can give you - they will inspire you, and scare you, and motivate you and smack you in the face with a reality check. But, they will also make you a stronger candidate. Whether it's talking with voters, fundraising, understanding local government policy, promoting your candidacy or even knowing how to best serve your community, learning from these people's experiences - and avoiding mistakes that they've already made for you - will give you a leg up on any opponent.

An explosive expose of Samsung that “ reads like a dynastic thriller, rolling through three generations of family intrigue, embezzlement, bribery, corruption, prostitution, and other bad behavior ” (The Wall Street Journal). **LONGLISTED FOR THE FINANCIAL TIMES AND MCKINSEY BUSINESS BOOK OF THE YEAR AWARD** Based on years of reporting on Samsung for The Economist, The Wall Street Journal, and Time, from his base in South Korea, and his countless sources inside and outside the company, Geoffrey Cain offers a penetrating look behind the curtains of the biggest company nobody in America knows. Seen for decades in tech circles as a fast follower rather than an innovation leader, Samsung today has grown to become a market leader in the United States and around the globe. They have captured one quarter of the smartphone market and have been pushing the envelope on every front. Forty years ago, Samsung was a rickety Korean agricultural conglomerate that produced sugar, paper, and fertilizer, located in a backward country with a third-world economy. With the rise of the PC revolution, though, Chairman Lee Byung-chul began a bold experiment: to make Samsung a major supplier of computer chips. The multimillion-dollar plan was incredibly risky. But Lee, wowed by a young Steve Jobs, who sat down with the chairman to offer his advice, became obsessed with creating a tech empire. And in Samsung Rising, we follow Samsung behind the scenes as the company fights its way to the top of tech. It is one of Apple’s chief suppliers of technology critical to the iPhone, and its own Galaxy phone outsells the iPhone. Today, Samsung employs over 300,000 people (compared to Apple’s 80,000 and Google’s 48,000). The company’s revenues have grown more than forty times from that of 1987 and make up more than 20 percent of South Korea’s exports. Yet their disastrous recall of the Galaxy Note 7, with numerous reports of phones spontaneously bursting into flames, reveals the dangers of the company’s headlong attempt to overtake Apple at any cost. A sweeping insider account, Samsung Rising shows how a determined and fearless Asian competitor has become a force to be reckoned with.
